# KB12150TR 12V 150Ah

Kaise motive power batteries are mainly used in electric bicycles, electric tricycles, low-speed electric cars, golf carts and sightseeing carts. The products are mainly supplied to the mainstream manufacturers in the industry.

# **Performance Characteristics**

| Nominal Voltage    | 12V                      |                                   |
|--------------------|--------------------------|-----------------------------------|
| Dimensions         | Length (mm / inch)       | 328 / 12.92                       |
|                    | Width (mm / inch)        | 180 / 7.09                        |
|                    | Height (mm / inch)       | 248 / 9.76                        |
|                    | Total Height (mm / inch) | 279.5 / 11.0                      |
| Approx Weight      | (Kg / lbs)               | 35.7 / 78.7                       |
| Terminal           | M8                       |                                   |
| Container Material | РР                       |                                   |
| Rated Capacity     | 150Ah / 7.5A             | (20hr, 1.75V / cell, 25°C / 77°F) |
|                    | 120Ah / 24A              | (5hr, 1.75V / cell, 25°C / 77°F)  |
| Reserve Capacity   | 25Amps                   | 280min                            |
|                    | 56Amps                   | 102min                            |

# Charge Method

Initial Charge:

 $\textcircled{1}0.1C_{\scriptscriptstyle 20}(A)$  charging 15h

 $\textcircled{2}0.05C_{20}(A)$  charging 10h

The temperature of the battery should be below 50  $^\circ C$  during charging.

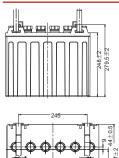

# Supplement Charge:

- a) Charging at a constant voltage of 14.7~15V/cell and a limited current 0.25C<sub>20</sub>(A) until the electrolyte density up to 1.280g/cm<sup>3</sup> (30°C) and the current not change for 3 hours.
- b) Charge with constant current  $0.1C_{20}$  (A) until the voltage between  $15.6 \sim 16.8$  V/cell, and voltage maintains for 3 hours and not change. Two method optional.

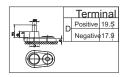

#### Cycle Life in Relation to Depth of Discharge

# Dimensions and Terminal (Unit: mm (inches))

#### **Applications**

328

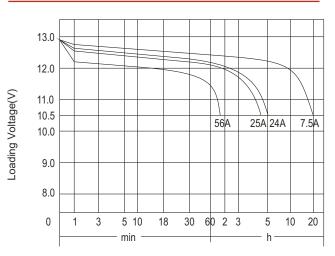

Electric bicycles Electric tricycles Electric cars Golf Carts Sightseeing Carts

### Certifications

ISO 9001 / ISO 14001

## Discharge Characeteristics (25°C, 77°F)

(Note) The above characteristics data are average values obtained within three charge/discharge cycles not the mimimum values.
